

Trivia Game Backend API Documentation

Overview

A turn-based trivia game API where players take turns answering questions. The game progresses through each player answering the same question before moving to the next round.

API Endpoints

1. Create New Game Session

POST <http://localhost:4000/api/games/>

Request Body

```
{
  "playerNames": ["Alson", "Connor", "Avery", "Alysse"],
  "totalQuestions": 1,
  "category": "Mind Games",
  "difficulty": "easy"
}
```

Response

```
{
  "success": true,
  "data": {
    "sessionId": "2796ca49-3465-4014-8617-8fb8e299b6f2",
    "players": [
      {
        "name": "Alson", "score": 0, "answers": [],
        "_id": "68ebe3b77cfeba65b868bd2a"
      },
      {
        "name": "Connor", "score": 0, "answers": [],
        "_id": "68ebe3b77cfeba65b868bd2b"
      },
      {
        "name": "Avery", "score": 0, "answers": [],
        "_id": "68ebe3b77cfeba65b868bd2c"
      },
      {
        "name": "Alysse", "score": 0, "answers": [],
        "_id": "68ebe3b77cfeba65b868bd2d"
      }
    ]
  }
}
```

```

    "currentQuestion": {
      "_id": "68e6bc3a93944f41babd4200",
      "category": "Mind Games",
      "difficulty": "easy",
      "type": "multiple",
      "question": "Which number is missing: 1, 1, 2, 3, 5, 8, ?",
      "options": ["13", "11", "15", "12"]
    },
    "currentPlayer": "Alson",
    "currentQuestionIndex": 0,
    "totalQuestions": 1,
    "status": "active"
  }
}

```

2. Get Game State

GET <http://localhost:4000/api/games/{sessionId}>

Response

```

{
  "success": true,
  "data": {
    "sessionId": "2796ca49-3465-4014-8617-8fb8e299b6f2",
    "players": [
      // Same player structure as above
    ],
    "currentQuestion": {
      "_id": "68e6bc3a93944f41babd4200",
      "category": "Mind Games",
      "difficulty": "easy",
      "type": "multiple",
      "question": "Which number is missing: 1, 1, 2, 3, 5, 8, ?",
      "options": ["13", "12", "11", "15"]
    },
    "currentPlayer": "Alson",
    "currentQuestionIndex": 0,
    "totalQuestions": 1,
    "status": "active"
  }
}

```

3. Submit Answer

POST <http://localhost:4000/api/games/{sessionId}/answer>

Request Body

```
{
  "playerName": "Alson",
  "answer": "13"
}
```

Response

```
{
  "success": true,
  "data": {
    "sessionId": "2796ca49-3465-4014-8617-8fb8e299b6f2",
    "players": [
      {
        "name": "Alson",
        "score": 1,
        "answers": [
          {
            "questionId": "68e6bc3a93944f41babd4200",
            "userAnswer": "13",
            "isCorrect": true,
            "_id": "68ebe4517cfeba65b868bd3e",
            "answeredAt": "2025-10-12T17:24:33.043Z"
          }
        ],
        "_id": "68ebe3b77cfeba65b868bd2a"
      },
      // Other players remain unchanged
    ],
    "currentQuestion": {
      // Same question structure
    },
    "currentPlayer": "Connor", // Moves to next player
    "currentQuestionIndex": 0,
    "totalQuestions": 1,
    "status": "active",
    "previousAnswer": {
      "player": "Alson",
      "question": "Which number is missing: 1, 1, 2, 3, 5, 8, ?",
      "userAnswer": "13",
      "isCorrect": true
    }
  }
}
```

4. Get Final Results

GET <http://localhost:4000/api/games/{sessionId}/results>

Response

```
{
  "success": true,
  "data": {
    "sessionId": "2796ca49-3465-4014-8617-8fb8e299b6f2",
    "players": [
      {
        "name": "Alson",
        "score": 1,
        "answers": [
          {
            "questionId": {
              "_id": "68e6bc3a93944f41babd4200",
              "category": "Mind Games",
              "difficulty": "easy",
              "type": "multiple",
              "question": "Which number is missing: 1, 1, 2, 3, 5, 8, ?",
              "correctAnswer": "13",
              "incorrectAnswers": ["11", "12", "15"],
              "explanation": "This is the Fibonacci sequence..."
            },
            "userAnswer": "13",
            "isCorrect": true,
            "_id": "68ebe4517cfeba65b868bd3e",
            "answeredAt": "2025-10-12T17:24:33.043Z"
          }
        ],
        "_id": "68ebe3b77cfeba65b868bd2a"
      },
      // Other players with their answers
    ],
    "questions": [
      {
        "_id": "68e6bc3a93944f41babd4200",
        "question": "Which number is missing: 1, 1, 2, 3, 5, 8, ?",

      }
    ],
    "winner": {
      "name": "Alson",
      "score": 1
    },
    "message": "🏆 Alson wins with 1 points!"
  }
}
```

Game Flow Explanation

How the Game Works:

1. **Setup:** Create game with players, questions, category, and difficulty
2. **Turns:** Each player answers the same question in sequence
3. **Scoring:** 1 point for correct answers, 0 for incorrect
4. **Progression:** After all players answer, game moves to next question
5. **Completion:** When all questions are answered, game ends and results are available
